Interesting and chilling game. Grab it. This game is a scam!. The entire game is worth buying! I wasn't dissapointed with any episodes. I had extreme fun with every single episode and with the limited attempt targets it's even more awesome. This game is not for the story so if you're looking for a good story this one is good however short but the main fun of the game is to replay missions and kill your targets\ do other objectives in different ways. I also enjoy going on a npc murder rampage every once in awhile anyone else? Just me... ok. This is one of those games that feels difficult and frustrating in the beginning, but you get sucked in so easily that you can play this for hours before deciding to switch to another game.. In the end, Seal Team 12 doesn't stand out in any way, as its bad writing (which seems to be purposeful) doesn't get the laughs it wants, and the gameplay is too generic for it to stand out in any way. While the games controls are solid and the gameplay functions, its just not the type of game that will keep your interest for too long. Only for those who really need a top-down experience and have nothing else to play.

For more information and gameplay: <https://www.youtube.com/watch?v=Zf0PcmCNXnE>. [This game is a key to my stress levels IVE NEVER BEEN GLAD ENOUGH TO KILL MYSELF PLAYING THIS GAME DO NOT BUY THIS GAME I MADE A MISTAKE CUZ OF THIS HOE SO DO NOT DO WHT I DID STAY AWAY FROM THIS GAME](#) 

[Thanks Have a nice day :\). Can't play with just a keyboard. Not sure if it's just me or not but the game only works with a xbox controller? Also I can't raise the resolution to 1920x1080 so not sure again but to have these problems right off the bat.. not to mention online multiplayer is discontinued. Even though I got this for cheap to me it's unplayable so unless I invested in googling for the answer. Therefore as protest I will not bother and I will accept that this game is crap. Thank you and good day.](#)

Roller Coaster Tycoon with oil.

If you want to be an imperor of black gold and keeping the world in motion, this is for you. I can recommend this even in EA. Give it a try. This is the worst game i've ever played. just like portal but a sidescroller! love this game. Nice game, you can hear hardbass and bear is dance. Before I start the review proper I just want to mention that it's **rich that the people part of this community that gave Goat Simulator overwhelming positive reviews and got Grass Simulator on Steam because they're stupid enough to be bribed with keys think they have any right to judge a game with barely a plot harshly. Really amusing.**

Anyway, yes the plot is thin. Annoyingly so. I didn't get to see just what kind of creature the protagonist was nor why he was there and the ending was basically a downer of epic proportions similar to Hellraiser but from the start it was quite obvious this would be one of those "The journey is the story" games. I'm pretty sure that the ending is intentional since the game has "Grim" in its name though.

Otherwise as far as gameplay goes I'm in love with it for similar reasons I was in love with Amnesia and Penumbra. The physics and world interactivity is awesome. So is the lighting (Those warm and cool color combinations look so damn pleasing to the eye). I'm not really one that cares much for puzzles but in this case I just like seeing physics objects bounce around and there's plenty of that here. Kind of makes one wonder where the complaints are coming from since if I can manage to negotiate a puzzle in a game I'm pretty sure anyone else can.

The game is also technically interesting because of the engine the author wrote. It's a really simple one that just uses SDL, Bullet for the physics and TGA based sprites. I love it when people do stuff like this. So easy to just squeeze out a turd with Unity these days so it's extremely refreshing to see someone take a design and make it their own from the bottom up. This sort of thing is exactly what makes me remember the good times I had in my gamedev stints and makes me want to get back to it.

I did a series on it [here](#). Beware though, there's a whole lot of complaining from me about the morons that infest this community in it.. a didactic documentary ([y](#)). This game is bringing what Scrap Mechanic is not capable to deliver after 1 or 2 years of unstable development. Rover builder will let you create a really cool transporter which will have realistic (!) suspension, flexible connections in between parts, steering racks, links, damage physics and so much more. It seems to be that the game is using advanced technology and nice video engine. And this is the second day of early release, imagine what is coming. Overall, good job developers that you created a heavy-duty competition to Scrap Mechanic as that game is [is\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665off](#) everyone. I am looking forward to see if they can establish a positive and real time interaction with community to consider most important concerns that will lead to the success of this project.

Recommended for purchase!. its an interesting economic simulator, but feels rather clunky and dated today.

the visuals are lively, and the music adds tremendously to the atmosphere.

i gave up after playing the tutorial, but there's lots more to do, and i'm sure others will have played this game more than i did..

Great Little dungeon blobber.

Lotsa Secrets to find

Good Classes to pick from

Bit to short though.

.A simple time killer game, more like mobile/web game.

Pretty art style and 4 waifus

Too bad you can only play as 1 character, also other than weapons, the characters doesn't change visually in appearance.

No controller support.
